Erasmus+ Call: 2019 - KA2 -

Erasmus+

This project is funded by the European Union.

3D printing technology aims students understanding maths and recycling procedure

*Curricula 2: Digital Sketching  
"User Interface & Tools"*

Output 3 (O3) - 3D Printing and Maths

# Overview (1/2)

In this lesson we take a deeper look at SketchUp's user interface. We learn about the way the interface is divided into useful sections, and what kind of information each section contains. Then we take a closer look some basic tools and their functionality. These tools include: Select, Eraser, Rectangle, Circle, Push/Pull, Move, Orbit and Pan.

# Overview (2/2)

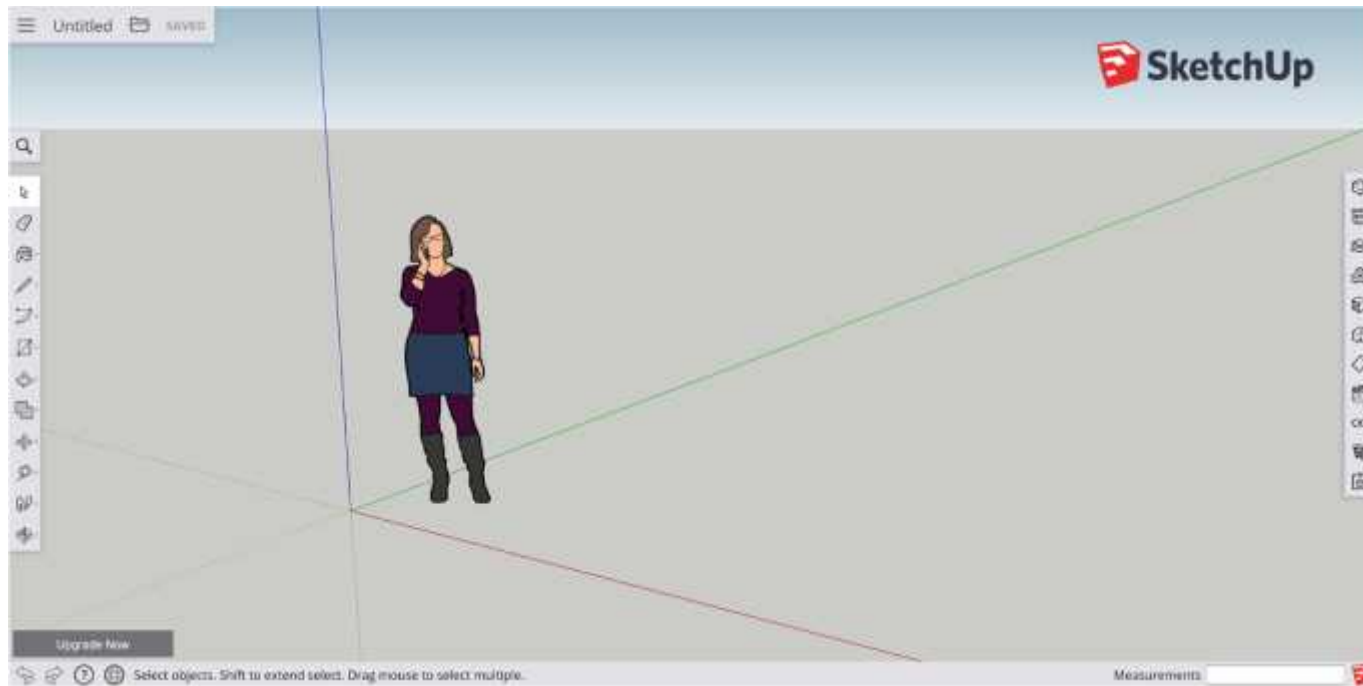

- User Interface
- Navigation
- Basic Tools

# User Interface (1/8)

The space where interactions between humans and machines occur

## User Interface (2/8)

- xyz 3D dimensional coordinate system
- 3D space
- The human creatures are called “Scale figures” and are there to give you a sense of the size of what you are drawing in perspective of the human scale

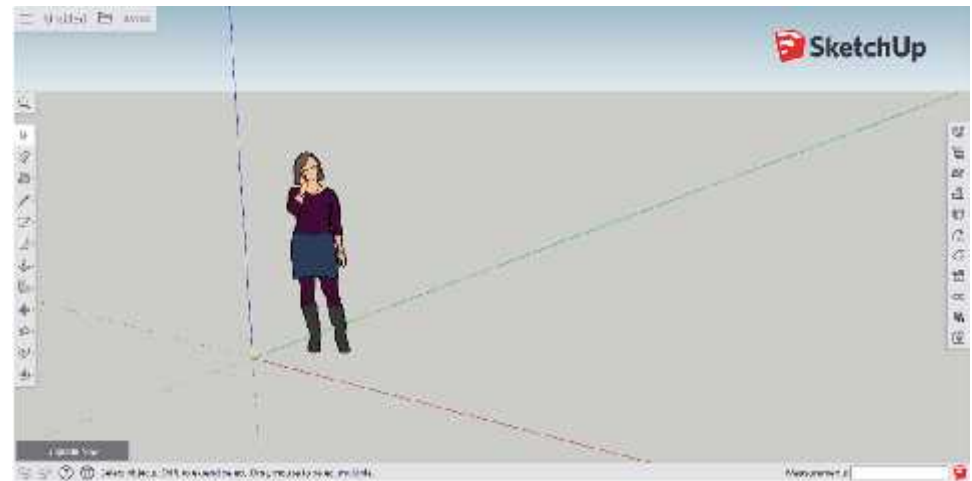

# User Interface (3/8)

The interface is divided into five (5) sections:

- Home
- Toolbars
- Panels
- Status Bar
- Measurements

# User Interface (4/8)

## Home:

- Access model preferences
- Save projects
- Name the model
- Save the model

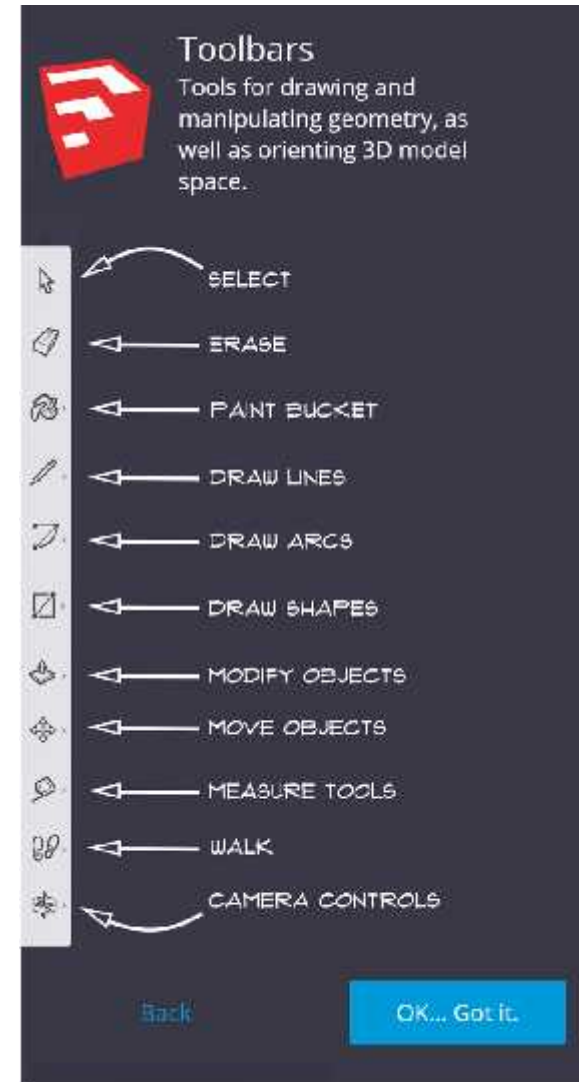

# User Interface (5/8)

## Toolbars:

- Tools that you can use to draw things inside on SketchUp
- The arrow indicates that tools have multiple options

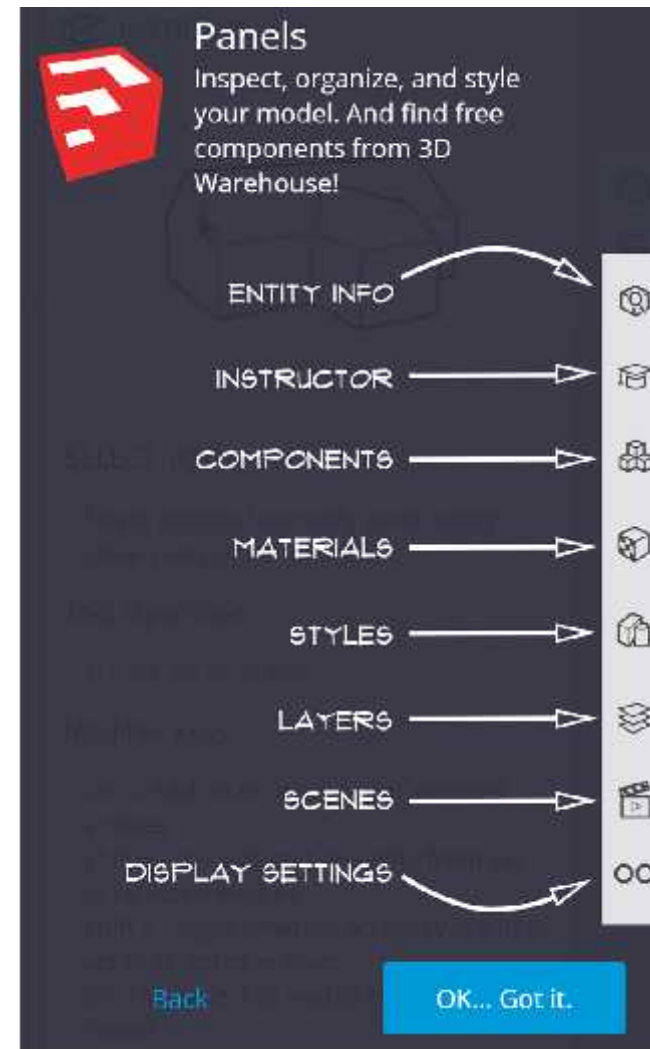

# User Interface (6/8)

## Panels:

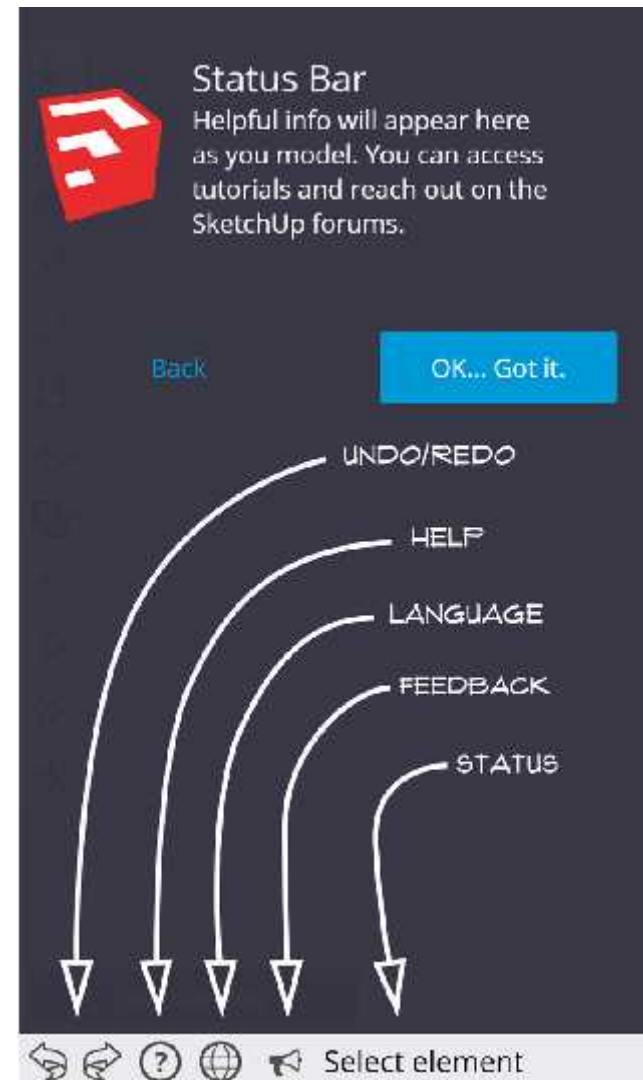

- information about the selective object (components, materials, etc)

# User Interface (7/8)

## Status Bar:

- Access to help
- Information about the active tool

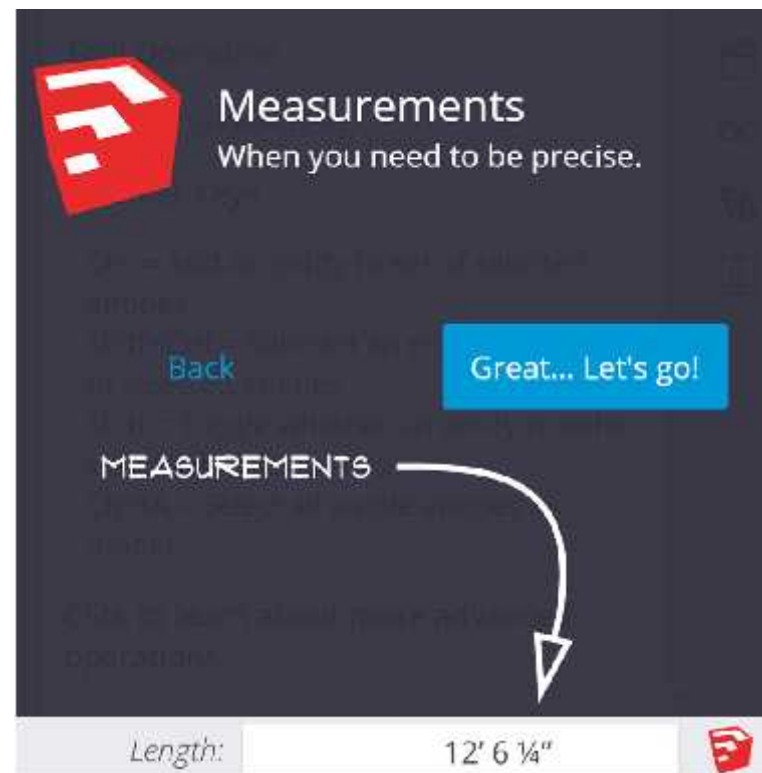

# User Interface (8/8)

## Measurements:

- Information about dimensions associate with the active tools

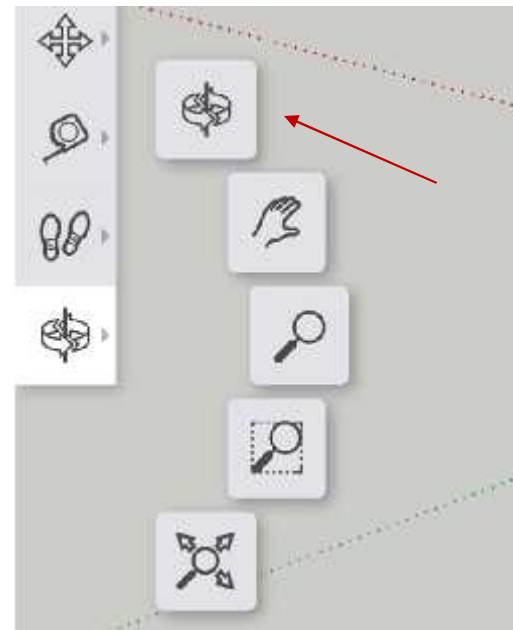

# Navigation (1/3)

## Orbit:

- Rotate around the object/scene

TIP: you can orbit by click and hold you center mouse button (scroll wheel)

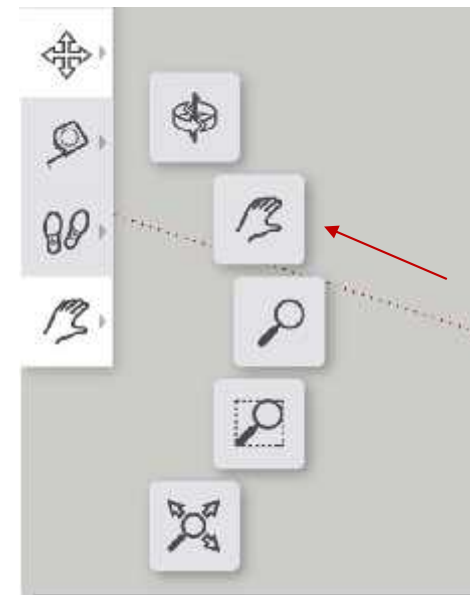

# Navigation (2/3)

## Pan:

- Drag the view left or right

TIP: you can pan by click and hold the shift key and the center mouse button

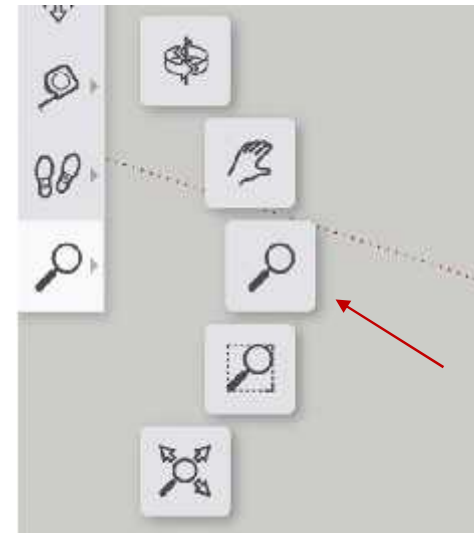

# Navigation (3/3)

## Zoom:

- Zoom in or out on the object

TIP: scroll up and down the center mouse button

# Basic Tools (1/5)

## Select:

- Select objects that lying inside the 3D space
- For example the cube

# Basic Tools (2/5)

## Erase:

- Select objects you want to erase
- Then choose the erase tool and click over the object

For example the top and bottom face of the cube

# Basic Tools (3/5)

## Draw Shapes:

- From the toolbars select the rectangle tool
- Click once drag your mouse and then click again

TIP: SketchUp works with clicks don't keep pressed your button.

# Basic Tools (4/5)

## Draw Shapes:

- From the toolbars select the circle tool
- Click once drag your mouse and then click again

TIP: SketchUp works with clicks don't keep pressed your button.

# Basic Tools (5/5)

## Modify objects:

- From the toolbars select the push/pull tool
- Click once drag your mouse and then click again

TIP: SketchUp works with clicks don't keep pressed your button.
